

OUR PROGRAMS

5-WEEK CNA PROGRAM

8-WEEK PHLEBOTOMY COURSE

8-WEEK EKG COURSE

The Basic Nursing Assistant Training Program (CIP Code 51.3902) consists of 120 clock hour of coordinated theory, lab and clinical learning activities. The program covers concepts on basic nursing skills. It is designed to prepare students function under the supervision of the Registered Nurse in various healthcare settings. Successful completion of the program will lead to eligibility to sit for the competency exam administered by Southern Illinois University of Carbondale (SIUC). Upon successful passing of the state competency exam, the student's name will be added in the Nurse Aide Registry which means that a student can work as a Certified Nursing Assistant (CNA) in healthcare facilities.

This 120 clock hour program prepares the graduate to function as phlebotomist and as a vital member of the clinical laboratory team whose main function is to obtain patient's blood specimens by venipuncture and micro collection along with transportation of other clinical laboratory specimens.

This 40 hours training will discuss the basic structure and functions of the heart, common cardiac disorders, subjective and objective data, diagnostic tests, how to perform ECG or record the heart's electrical impulses onto a paper strip. Students will have an understanding of the pattern of the signals of the heart to determine to determine normal or abnormal electrical problems. The ECG Technician will administer and document various types of ECG monitoring and will provide appropriate care of the equipment.

*Employment assistance available
after course completion!*

ABOUT US:

For several years, we have been active in the field of nursing education. We saw the importance of providing the right training to healthcare students in order for them to perform their work properly, efficiently and safely. AVID CNA School was created with a purpose producing graduates who will become excellent future providers of patient care
